**ABSTRAK**

*The study intents to answer the financial performance in Indonesia and Malaysia country at oil and gas sector industry. Samples were taken from companies listed in capital market in Indonesia and Malaysia. Pooled time series data consists of 36 for Indonesia and 54 for Malaysia data included in the sampel for six year periods of 2007, 2006, 2005, 2004, 2003, and 2002. The parametric statictic methods of paired samples t-test with their standard were used to test the hypothesis. The results indicate that oil and gas sector industry in Indonesia has three weak financial performance (current ratio, solvensi, total profitability) and one that wealth for internal profitably. And the result in Malaysia has wealth for all financial performance.*

*Key words: oil and gas sector industry, financial performance, pooled time series, Indonesia, Malaysia*
